t20q

top twenty questions for forestry & landscapes

Have your say about research priorities to inform decisions about forests, forestry and landscapes

“T20Q (<http://forestryevidence.com/t20q>)” is a global consultation to identify the most important research questions to inform decisions about forests, forestry and landscapes.

T20Q, the “Top 20 Questions for forests, forestry and landscapes”, offers anyone with an interest in these important issues the opportunity to nominate their priority questions for research to better inform policy and practice.

Responses will help answer questions such as: how should research institutions such as CIFOR, with a

global mandate and responsibilities, identify potential research priorities? How can priority-setting draw effectively on the knowledge, expertise and insights of the global community of researchers and practitioners? The T20Q project is informed by [several recent initiatives](http://blog.cifor.org/22157/to-set-priorities-for-research-ask-the-right-questions) (<http://blog.cifor.org/22157/to-set-priorities-for-research-ask-the-right-questions>) responding to questions like these in other topic areas.

Responses are anonymous, but basic descriptive information provided by respondents will allow priorities to be reported at global, regional and national levels, and for particular communities of interest. So T20Q will also inform many levels and arenas of decision making.

Nominate your priorities, and encourage your colleagues to nominate theirs, through the [T20Q website](http://forestryevidence.com/t20q/questioning) (<http://forestryevidence.com/t20q/questioning>). Follow the discussion on Twitter [@Forestry_Q](https://twitter.com/Forestry_Q) (https://twitter.com/Forestry_Q) and via the hashtag #t20q.

T20Q is part of the [Evidence-Based Forestry Initiative](http://www.cifor.org/ebf) (<http://www.cifor.org/ebf>) led by CIFOR and its partners, and is supported by the UK Department for International Development’s KNOW-FOR program.
