

PEN Code List

1 General

Several questions are 1-0 questions, where **1 = yes** and **0 = no**

Some questions may not apply or the respondent simply cannot answer. The following codes are used for that:

- **8 = does not apply**

- **9 = the respondent (or I) does not know**

Note the **minus (-)** to be put in front. This is done to clearly distinguish between these answers (-8, -9) and any regular answer.

All years are written with 4 digits, i.e., **yyyy**. All dates should be written in the year-month-date format, i.e.: **yyyymmdd**

The code **999** can also be used for “other” in all the code lists below, although one would like to keep this to an absolute minimum. Instead, new codes should be suggested.

For district, village, household and person codes, see the guidelines, section 5.1.

2 Common codes used in prototype questionnaire

2.1 Products (code-product)

This code list covers all products for which data are being collected. Thus it includes forest products (raw and processed), agricultural products, and products collected from non-forest areas (labeled “non-forest environmental income” in the questionnaire).

One important distinction is made between unprocessed (raw-material) forest products and processed forest products. “Processed” means a significant modification or change of the product, e.g., turning wood into charcoal or a chair, or turning clay into a pot. Minor modifications (e.g., cutting rattan canes or bark into smaller pieces, or washing and drying the product) would not qualify, and the products should still be classified as unprocessed.

Note that codes from the agricultural products code list (201-) can be used for products collected from the forest. For example, a wild fruit can be classified under the general code for wild fruits (21) or as that particular fruit, e.g., durian (315).

Table 1. Overview of product codes:

1. Harvested products from the wild (incl. forests) – in the raw	1-100, ++
i. Wooden perennials and wooden-based products	1-20, 651-750, 901-1000, 1151-1200, 1401-1500
ii. Non-wooden plants and plant-based products	21-50, 551-599, 751-900; 1351-1400
iii. Animals and animal-based products	51-70, 601-650, 1001-1100
iv. Minerals and others	71-100
2. Processed products from the wild (incl. forests)	101-200, ++
i. Wooden-based products	101-130, 1301-1350
ii. Non-wooden based products	131-200
3. Agricultural crops	201-550, ++
Cereals	201-220
Roots and tubers	221-240
Legumes	241-270
Vegetables	271-310, 1101-1150

NOTES:

- Palm heart seems to have received two codes: 44 and 560. Either can be used as they will be merged at a later stage.
- By mistake, there are also two codes for apple (331 and 337), and for ginger (278 and 365) but since PEN partners might have started using both, they will only be merged at a later stage.
- Some codes are put twice as can belong to more than one category.

2.2 Forest markets (code-market)

A major distinction is made between: (i) when the household sell the product within the village, and (ii) when the household itself (or in cooperation with other households) transport the produce outside the village and sell it there. Note that the relevant question is: *To whom does the household sell the product?* Thus it refers to the first step in the marketing chain, not where the product is being processed or consumed.

Some borderline cases will still exist. For example, your neighbour may take your product to the market in a neighbouring village and sell it there to consumers. If this is part of an arrangement where neighbours take turns and go to the market, and then are paid whatever price is obtained, code 21 would be the appropriate. If the neighbour buys it like a regular agent or trader, then code 12 should be used.

To whom	Code	Comments
1. Sold within the village	(10-19)	
Friends and relatives	10	
Directly to consumers	11	E.g., taking the produce to the market and selling directly to consumers, or selling along roadsides.
Private wholesale buyer	12	Agent, trader, middleman, or similar
Processing factory	13	
Producer organization	14	
Government agency	15	
Other	19	
2. Sold outside the village	(20-29)	
Friends and relatives	20	
Directly to consumers	21	E.g., taking the produce to the market and selling directly to consumers, or selling along roadsides.
Private wholesale buyer	22	Agent, trader, middleman, or similar
Processing factory	23	
Producer organization	24	
Government agency	25

2.3 Land categories (code-land)

These categories correspond with table V1D1 (section D in Village survey 1). See also the definitions given in the Technical Guidelines.

Category	Code	Comments
<i>Forests:</i>		
Natural forest	10	
Managed forests	20	
Plantations	30	
<i>Agricultural land:</i>		
Cropland	40	
Pasture (natural or planted)	50	
Agroforestry	60	
Silvipasture	70	
Fallow	80	< 15 years since cultivation, see guidelines
<i>Other land categories:</i>

Grassland	100	
Residential areas & infrastructure	110	
Wetland	120	
Coast (sea)	130	
Other	199	

2.4 Forest categories (code-forest)

The forest categories follow the same three forest categories in the land classification above (see also PEN guidelines on definitions). In addition, each forest category is split between open and closed forest, the dividing line being 40 % canopy cover. To the extent possible, the researchers should use the open/closed categories, that is, use codes: 11, 12, 21, 22, 31, 32. In some cases, however, it may be very hard to make this distinction and the aggregate categories can be used, that is, codes: 10, 20, 30.

Category	Code	Comments
Natural forest	10	
Natural forest - closed	11	Canopy cover > 40 %
Natural forest - closed (seasonally-inundated)	111	
Natural forest - closed (dominated by palms)	112	
Natural forest - open	12	Canopy cover < 40 %
Managed forests	20	
Managed forests - closed	21	Canopy cover > 40 %
Managed forests - closed (seasonally-inundated)	211	
Managed forests - open	22	Canopy cover < 40 %
Managed forests - open (seasonally-inundated)	221	
Plantations	30	
Plantations - closed	31	Canopy cover > 40 %
Plantations - open	32	Canopy cover < 40 %

2.5 Tenure regime (code-tenure)

The actual land tenure regimes consist of several dimensions, which should be reflected in the coding system used. We have used a lexicographic classification that consists of three dimensions or levels, where each dimension is represented by one digit in the three digit code used:

1. The formal or legal (*de jure*) owner of the land, which is the entity with the *transfer* rights (rights to sell, lease or rent out the land). We distinguish between three such entities: (1) the state at national or regional level; (2) communities or more generally: groups of people; (3) private entities (individuals or companies).
2. The actual or *de facto* owners of the land, that is, those that use it and have the *de facto* use rights (but normally not the transfer rights, neither *de facto* nor *de jure*). One problem in classifying land tenure is the overlapping use rights on the same piece of land, for example, some use rights can be held by individual households (e.g., using land for agriculture), while others are held by the community (e.g., collecting dead firewood or wild fruits). To capture this, we introduce a mixed category for community and individual *de facto* land rights, covering the situation used in the example. Thus we operate with seven categories: (1) state, (2) community, (3) private, (4) state-community, (5) state-private, (6) community-private, and (7) state-community-private.
3. The degree of enforcement of rules, which regulates access (who are the users), permissible uses, and possibly also the management of the land and its resources. Three categories are distinguished: (1) high, (2) moderate/low, and (3) no enforcement of rules. Note that the rules might be set by the *de facto* and/or the *de jure* owners, and may have the backing by either the state or customary institutions.

Note that *open access* is rarely a separate land category at the *de jure* level, in the sense that land almost always has a *de jure* owner (and the state often being the default owner). But *de facto* open access can appear within all categories of *de jure* owners, in situations with *no enforcement* of rules, or rules do not exist.

A distinction should be made between community and private *de facto* use rights. Private use rights refer to situations where only *one* individual, household or lineage has the rights to use the resource, while community rights refer to situations where a more or less well-defined *group* of people have the rights.

In the 3-digit tenure code the first digit refers to *de jure* owner, the second to the *de facto* user, and the third digit to the degree of rules enforcement. Only codes which specify all the three dimensions should be used, i.e., only the codes in **bold** in the table.

In short, land tenure should be categorized by asking three questions:

1. Who are the formal (*de jure*) owners: state, community or private? (1-3)
2. Who are the actual users: state, community, private, or some combination? (1-7)
3. To what extent do rules of access and use exist, and if they do, how well are they enforced? (1-3)

This generates a total of $3 \times 7 \times 3 = 63$ combinations, shown in the table below. But, some of the codes will probably never be used as they are unlikely combinations.

Tenure regime	Code	Comments/examples
State <i>de jure</i> owner	1	
State <i>de facto</i> user	11	
High enforcement of rules	111	E.g., a well-protected national park
Medium/low enforcement of rules	112	
No enforcement of rules (open access)	113	
Community <i>de facto</i> user	12	
High enforcement of rules	121	E.g., a community forest management system, where the state is the legal owner, but the forest is managed and used by the community with strong enforcement of the rules set.
Medium/low enforcement of rules	122	
No enforcement of rules (open access)	123	A typical open access case: forest owned <i>de jure</i> by the state, but used by villagers and few/no rules exist or are enforced.
Private <i>de facto</i> user	13	E.g., squatters on public (state) land which use it for agriculture.
High enforcement of rules	131	
Medium/low enforcement of rules	132	
No enforcement of rules (open access)	133	
State-community <i>de facto</i> user	14	
High enforcement of rules	141	
Medium/low enforcement of rules	142	E.g., a forest reserve owned <i>de jure</i> by the state, but with weak enforcement and some (illegal) local use
No enforcement of rules (open access)	143	
State-private <i>de facto</i> user	15	
High enforcement of rules	151	
Medium/low enforcement of rules	152	
No enforcement of rules (open access)	153	

Tenure regime	Code	Comments/examples
Community-private <i>de facto</i> user	16	E.g., shifting cultivators in <i>de jure</i> state forest, with individual use rights based on regular forest clearing and cultivation, and collection by community of NTFPs.
High enforcement of rules	161	
Medium/low enforcement of rules	162	
No enforcement of rules (open access)	163	
State-community-private <i>de facto</i> user	17	
High enforcement of rules	171	
Medium/low enforcement of rules	172	
No enforcement of rules (open access)	173	
Community <i>de jure</i> owner	2	
State <i>de facto</i> user	21	These categories seem unlikely.
High enforcement of rules	211	
Medium/low enforcement of rules	212	
No enforcement of rules (open access)	213	
Community <i>de facto</i> user	22	Similar to 12, but the community fully owns the forest.
High enforcement of rules	221	
Medium/low enforcement of rules	222	
No enforcement of rules (open access)	223	
Private <i>de facto</i> user	23	
High enforcement of rules	231	
Medium/low enforcement of rules	232	
No enforcement of rules (open access)	233	
State-community <i>de facto</i> user	24	
High enforcement of rules	241	
Medium/low enforcement of rules	242	
No enforcement of rules (open access)	243	
State-private <i>de facto</i> user	25	
High enforcement of rules	251	
Medium/low enforcement of rules	252	
No enforcement of rules (open access)	253	
Community-private <i>de facto</i> user	26	E.g., a community owned forest with community use but also some agricultural encroachment by farmers.
High enforcement of rules	261	
Medium/low enforcement of rules	262	
No enforcement of rules (open access)	263	
State-community-private <i>de facto</i> user	27	
High enforcement of rules	271	
Medium/low enforcement of rules	272	
No enforcement of rules (open access)	273	
Private <i>de jure</i> owner	3	
State <i>de facto</i> user	31	These categories seem unlikely.
High enforcement of rules	311	
Medium/low enforcement of rules	312	
No enforcement of rules (open access)	313	
Community <i>de facto</i> user	32	
High enforcement of rules	321	
Medium/low enforcement of rules	322	
No enforcement of rules (open access)	323	
Private <i>de facto</i> user	33	
High enforcement of rules	331	The 'classical' private property case. May also include land rented in/out in this category

Tenure regime	Code	Comments/examples
Medium/low enforcement of rules	332	
No enforcement of rules (open access)	333	
State-community <i>de facto</i> user	34	
High enforcement of rules	341

No enforcement of rules (open access)	343	
State-private <i>de facto</i> user	35	
High enforcement of rules	351	
Medium/low enforcement of rules	352	
No enforcement of rules (open access)	353	
Community-private <i>de facto</i> user	36	E.g., NTFP harvested by villagers from a <i>de jure</i> private forest, but neither logging nor agriculture accepted.
High enforcement of rules	361	
Medium/low enforcement of rules	362	
No enforcement of rules (open access)	363	
State-community-private <i>de facto</i> user	37	
High enforcement of rules	371	
Medium/low enforcement of rules	372	
No enforcement of rules (open access)	373	

2.6 Mode of transport (code-transport)

Mode of transportation	Code	Comments
Foot	1	
Bike	2	
Motorbike	3	
Donkey/horse/ox cart	4	Include directly carrying the load on their back
Tractor	5	Refers to the conventional tractors with 2 (or more) large driving wheels, and 2 (or 1) steering wheels. Does <i>not</i> include the small, two-wheel engine-powered devices (sometimes called hand-tractors).
Car/van	6	
Truck/lorry	7

Trade and marketing	10	
Carpentry	11	
Construction	12	
Mechanical	13	E.g., working in a garage and similar
Mining	14	
Local cottage industry (not included elsewhere)	15	“Cottage industry” refers to small-scale producers working from their homes, typically part time. Some cottage industries might fall in other categories (e.g., carpentry), & should be classified there (code 11)
Manufacturing industry	16	
Service industry	17	E.g., restaurant, hotel, store
Government employee	18	E.g., a teacher
Community employee	19	E.g. forest watcher, secretary of FUG
Tailor, shoe maker, or similar	20	
Blacksmith/goldsmith	21	
Domestic work	22	E.g., cook, servant, babysitter, ... in another home
Field/research assistant/guide	23	
Forest guard/ranger	24	
Quarrying	25	
Guard (non-forest related)	26	
Painter	27	
Aquatic products processing	28	
Cook	29	
Road construction/maintenance	30	
NGO worker	31

Boat repair shop employee	41	
Processing plant employee	42	
Oil company reforestation crew	43	
Driver	44	
Wage work grazing	45	
Other	99	Try to avoid this, and instead have new codes added by contacting the PEN coordinator

2.8 Units of measurement (unit-code)

Local units of measurement can be used, both when filling out the questionnaire, and when entering the data into the databank. If local units are used, the conversion factor to metric units must be reported. The table below will be supplemented to include the local units used in the various PEN studies. The units will be location-specific, e.g. one bag of rice in Vietnam may not have the same weight (kg) as one bag of rice in Bolivia.
