

CIFOR at the 2017 World Bank Land and Poverty Conference

Responsible Land Governance

Towards an evidence-based approach

20–24 March 2017 | World Bank | Washington, DC

CIFOR invites you to its presentations at the World Bank's 2017 Land and Poverty Conference, including discussions of gender and oil palm, mangrove governance in Tanzania and Indonesia and the devolution of forest rights in Nepal.

A policy dialogue, South-South exchange between representatives from Uganda, Peru, Indonesia, Nepal, Colombia and Kenya on the implementation of tenure reform, and a MasterClass on forest tenure security will be key CIFOR-led events at the conference.

SOUTH-SOUTH EXCHANGE

CIFOR Policy Dialogue: Tenure Reform Implementation
What have we learned?

Wednesday, 22 March 2017 | 08:30–10:00 | Room: MC 13-121

Over the past two decades, many countries in Africa, Asia and Latin America have adopted and implemented reforms in the natural resources sectors that have aimed at devolving or decentralizing forest and land management to lower levels of governance. The reforms have been aimed at securing the tenure rights of local communities living adjacent to forest resources as a pathway to improved livelihoods and sustainable use and management of forest resources. In addition, reforms have also targeted increased participation of different actors in decision making including women and marginalized groups.

What have been the main barriers or enablers of tenure reform implementation? How have key barriers been addressed? What approaches have ensured that reforms meet their intended objectives? How can learning be integrated into processes and structures of tenure reform implementation? This 90-minute session will answer these questions.

In the past five years, some countries have reviewed and re-authorized their laws while others are currently in the process of review and re-adjustment. What have we learnt thus far in implementing reforms?

MASTERCLASS

Land and Forest Tenure Reform Implementation and Tenure Security
An orientation for policy makers and practitioners

Friday, 24 March 2017 | 09:00–10:30 am | Room: MC 9-100 | Session: 13-07

Presenters: **Anne M. Larson, Esther Mwangi, Mani Ram Banjade**

What is tenure security? What are the key factors influencing forest tenure security? How can the tenure rights of multiple actors (men, women, indigenous groups, etc.) be secured during reform implementation? How can tenure security be advanced during reform implementation? These are some of the questions that participants will explore during this MasterClass session. The session will draw heavily from ongoing research and action under CIFOR's Global Comparative Study on tenure reform implementation and from related initiatives by CAPRi, FAO and the International Land Coalition.

The main objective is to enable participants to better understand the concept of land and forest tenure security, its multi-dimensional nature, linkages of tenure reforms with livelihoods and key future initiatives to secure the rights of forest and land-dependent communities. The session will also introduce participants to Participatory Prospective Analysis, a collaborative approach for analyzing tenure threats and identifying options for tenure security. The session will establish a community of practice and will be engaged over the course of the next two years in subsequent learning activities including a tenure café, electronic consultation and regional forums aimed at deepening our understanding of how to secure tenure rights in multiple settings.
